IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

IN RE APPLICATION OF: **Katsuhiko Shinjo, et al.** :

APPLICATION NO.: **09/870,090** : Examiner: **Ulm, John D.**

FILING DATE: **05/30/2001** : Group Art Unit: **1646**

TITLE: **HUMAN VANILLOID RECEPTOR-LIKE
PROTEINS**

Hon. Commissioner for Patents
Washington, D.C. 20231

RECEIVED
MAY 06 2003
TECH CENTER 1600/2900

RESPONSE TO RESTRICTION REQUIREMENT

In response to the Office Action mailed January 24, 2003 regarding the election of claims, Applicants elect claim set 1, with traverse.

The Commissioner is hereby authorized to charge any additional fees required, or to credit any overpayment, to Deposit Account No. 16-1445.

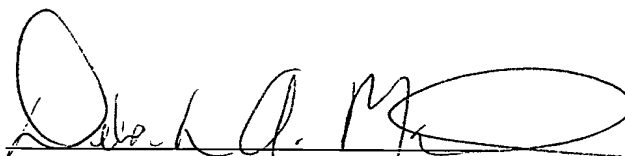

Applicants note that the polypeptide of VRL-2b (SEQ ID NO: 4) is an N-terminal truncated version of VRL-2a (SEQ ID NO: 2). While the overall nucleotide similarities between the two coding sequences for these polypeptides have 69.5 % similarity, the nucleotide sequences downstream of position 937 of the VRL-2a coding sequence (SEQ ID NO: 1) and position 88 of the VRL-2b (SEQ ID NO: 1) are completely the same. Accordingly, the polypeptides of claim set 1 (related to SEQ ID NO: 2) and claim set 2 (related to SEQ ID NO: 4) do indeed share a common technical feature. Therefore, Applicants request that the subject matter of claim set 2 be considered within the current application along with the subject matter of claim set 1.

Patent Application
Attorney Docket No. PC9979ADAM

Respectfully submitted,

Date: April 29th, 2003
